TWO COUPLES FLEE

A HOVERING LIGHT

FOUR Pescaderans (California) saw and signaled an unidentified flying light over the Butano Girl Scout Camp on Monday night, Nov. 2, 1964.

But when it responded and moved toward them, they panicked and fled.

The story was told to sheriff's deputies by Rudolph Huizen, 30, a caretaker at the camp.

He said at about 8:15 p.m. he heard a dog barking.

A friend, Duane Myers, 24, a Pescadero nurseryman, and he went outside to investigate. In the northeast sky they saw a very bright light about the size of a half dollar moving erratically.

"It was way up in the sky," said Huizen today. "Just for kicks I flashed an SOS at it with my flashlight. And that son-of-a-gun came down!"

There was no sound, he said, just a bright light.

"It came down and settled over the trees about half a mile away and moved back and forth. When I flashed my flashlight at it again it lit up the sky like a full moon. It was about as big as a football."

Huizen and Myers ran into the house, fetched their wives, Henny Huizen, 29, and Diana Myers, 20. The four watched the object for a while, signalled once more.

Then it moved toward them. They fled into the house.

"If you were standing in my shoes, you would have run too." said Huizen.

The four peeked out of the doorway, saw the light back away, grow dim.

"Then it took off," said Huizen. "No jet or any plane could go that fast."

He called Butano Forest Ranger Raymond Cavallero, who called the sheriff's office. Deputies who went out to the Girl Scout camp reported the object was gone, but that the observers were all quite sober.

Mystery Light Panics Couple

At 8:15 p. m. on 3 November 1964, Rudolph Huizen, 30, caretaker, and Duane Myers, 24, a nurseryman, were alerted by a barking dog at the Butano Girl Scout Camp near Pescadero, Californa. Both men went outside to investigate and immediately saw a very bright light "about the size of a half dollar" which was moving erratically in the northeast sky.

Huizen said it was " high in the sky" and "just for kicks" he flashed an SOS at it with his flashlight. The light began moving toward the men. It made no sound, just became larger and larger.

Huizen told deputies of the incident the next morning and said that after the first SOS the object came down and settled over the trees about a half a mile away and moved back and forth. Huizen flashed his light at it again and it "lit up the sky like a full moon. It was as big as a football.

At this point the two men ran into the house and brought their wives out to watch. The four watched for a while longer then signalled the SOS again. The object immediately responded and moved toward them. All four fled into the house and watched from the doorway as the object backed away and grew dim. "Then it toook off," Huizen reported, "no jet or any plane could go that fast."

Huizen called the Butano Forest Ranger Raymond Cavallero, who called the sheriff's office. Deputies who went out to the Camp reported the object was gone.

3 November 1964
Berea, Ohio

ELECTION NIGHT JITTERS

Berea, Ohio . . . November 3, 1964 . . . Three teen-aged girls found little interest in the elections that night. Like most Americans, Mr. and Mrs. Leligdon were glued to their T.V. sets.

The double feature sighting of the same or similar object took place about 45 minutes apart, and was by far more exciting to the girls.

At approximately 6:45 P.M., Nancy Beleny, 13, was walking west toward the home of the Louis Leligdons. As she neared her destination, she was startled by an extremely bright light which was descending slowly down toward the tall maple tree in Leligdon's back yard. The huge light seemed yellowish-white, and generally oval in shape. She watched just 5 seconds before excitedly rushing up onto Leligdon's front porch, pounded on the door, and excitedly and incomprehensively tried to tell them about the phenomenon.

By the time anyone got around to verifying the sighting, the light was no longer visible. Nancy in describing its intensity, said that she had to squint to look at it. It lit up the whole area around the garage and pool.

The girls periodically looked out the back window to see if the light was there. After about 45 minutes, one of the girls screamed that the light had returned. All three girls were there in a flash. This time the huge light was just above the level of the garage, and stationary. It then slowly started to rise vertically. One or two of the girls ran to the elder Leligdons to get them to come look.

Joan saw it last when it was about ten feet from the top of the tree, but even she didn't see it disappear. In the excitement she momentarily turned away from the object, when she looked again, it was gone. Nancy, who had seen the previous one, said it looked just like the one she had seen coming down, possibly larger. All agreed it had a generally oval shape, but that the shape was not necessarily symmetrical. Nancy said it was yellowish-white within the "shape", but gave off intense white light around its "edges". The Leligdon girls said it was completely white and hard to look at, with fuzzy edges.

It encompassed a width comparable to the tree itself which is about 40 feet, and vertically it varied from 8 - 12 feet, with the observers. The sky above was illuminated, too, as well as the fence, pool behind it, and neighboring trees, etc. No shards of light were seen lighting up the area of the Leligdon house. The light was silhouetted by the tree, and according to the girls the light was between the tree and the pool, a short distance north. After a while the girls went outdoors, and cautiosly went to the place where the light was seen.

The next morning, the girls decided to look around where the phenomenon had been observed. They found a place in the grass two feet in diameter where the grass was charred. The spot was verified by Mr. and Mrs. Leligdon. One of the girls said, "How could such a large object cause such a small place to be charred?"

No samples were saved and no check for radioactivity was made.

Accompanying the second sighting was an unusual sound that persisted with some short breaks until 10:00 P.M. They saw nothing strange.

Remarks relating to the sound follow: There was agreement that it was a monotonous, single pitch sound, with slight variation up or down due to a wavelike quality. It was plainly heard by Mrs. Beleney and her husband who live several houses east. Mrs. Leligdon said it was a high-pitched sound. Mr. Leligdon tried checking the telephone poles and wires on the street for its cause, but with negative results. (The same night as the sighting.) Mrs. Beleny said the sound that night persisted till 10:00 P.M.. She also added, and Susan Leligdon and Nancy agreed, that it was heard for about a week after that, mostly at night. (All agreed on this.) She said that it was not completely continuous; there were some short breaks during any one night. "Like the buzzing of radar," said Susan Leligdon. "Like the buzzing of many bees," said Nancy. On one morning, on the way to school, they heard it plainly.

. Mr. Beleny, an employee of NASA heard it too, but did not have an explanation. No explanation thus far.

Editorial Comment:

It reminds us of the night of February 17th, 1963, where similar but much more intense wave-like sounds were heard by a woman, Larry Moyers, and Milton Nice. In two places miles apart, apparitions of light appeared to the observers. In the one case the sound seemed to be associated with it, but again as here, persisted long after the "garage of light" had disappeared from sight. Moyers and Nice were tested by recorded sound, and guessed at 10,000 and 8,000 cycles per second.

Two reporters from the Berea News visited the sight and asked many questions. The Berea News published this story but failed to give a clear picture of the girls' experience. They mentioned other sightings these girls have had since the above described sighting, and the whole picture was well muddied by their treatment.

This excerpt is taken from the same article:

"Leo Sapienza, of the paper's advertising staff, an authority on aircraft and racing cars, says he has seen the "Berea Saucer" recently. "Yes, I am sure the girls are correct," Sapienza says, "I have seen it several times in recent days while observing the starts." ????? Sapienza, an amateur astronomer, says he believes flying saucers are real. "I don't claim they are from outer space, but I do believe they exist," he says.

Gary Davis and I both felt that Susan and Joanne Leligdon were sincere and consistent in answering the questions put to them. Nancy Belemy was just as sincere and even more enthusiastic about her experience.

I admit that subsequent sightings claimed by these girls seem to distort the validity of this, their first such experience. But it is my experience that when any young person has a sighting of such startling phenomena, they are enthusiastically and completely on the lookout? They scan the skies constantly, and many times misinterpret conventional aircraft and familiar natural phenomena.

These girls, especially Nancy, related that they are being "ridden hard" by many fellow students and some teachers. But these girls are not backing down for anybody, and their indignation is real.

Both the CUP, in the person of Al Manak, and Lawrence Blazey of the Cleveland UFO Society interviewed the girls.

4 November 1964
Bath Township, Ohio

November 4, 1964 . . . On that same morning, in Bath Township, another sighting was made. A doctor's wife was driving east on Bath Road, when she noticed a shiny object in the eastern sky, slightly south. She wasn't sure, but it seemed stationary to her, or just slow moving. Time 8:05 A.M. No other details. (This area is 15 miles NW of Justice's residence.)

4 November 1964
Springfield Township, Akron, Ohio

Springfield Township, Akron, Ohio . . . Berger Road . . . November 4, 1964 . . . 8:30 P.M. . . . Carl Justice looked into the NE sky. He thought he was seeing the approach of an airplane at high altitude. But the object was not moving. The object he saw was like a triangle with a flat top. Extending upward were three illuminated slender extensions. Two lights were situated at its base. (All lights white.) The object remained at its 40 degree elevation position for a considerable time. When he retired it was still there. When he started for work (7:30 A.M.), he found the object just slightly east of where it had been, but stationary. It was a shiny object then. No sound. (Testimony given Larry Moyers.)

6 November 1964
Olmsted Falls, Ohio

Olmsted Falls, Ohio . . . November 6, 1964 . . . 6:06 P.M. . . . Schady Road . . . It was clear and completely dark when the 4 observers' attention was drawn to a brilliant object in the sky to their S. The object was "right next to the moon," when first seen, and their estimate of elevation was 40-45 degrees.

The object which was the apparent size of a quarter blinked completely on and off, was as bright as automobile headlights, silvery-white in color, and had a poor outline, (Blurred)

The object travelled N toward them and the nearby Turnpike, then turned westward, moving alongside the S side of the Turnpike. Its speed was described as faster than any aircraft seen by them before. (Cleveland Hopkins Intl. Airport is 2 miles SE of them.) The object was in view for 2 minutes. No sound or trail, level flight.

Observers: Mr. and Mrs. Alfred Haag, Luanne Haag 16, and Jack Dover 15-1/2.

Bayville, New Jersey
9 November 1964

... NEW "PHYSICAL EVIDENCE": Dr. A. Kraig, a noted psychologist and parapsychological investigator, has submitted to SAUCER NEWS a considerable quantity of a strange thread-like substance which he discovered while driving his car along the Garden State Parkway, near Bayville, N.J., on the morning of November 9th. The material was on the crest of a hill about 30 feet back from the highway, and was lying in a fluff blanket strip about three feet wide and one mile long, interrupted at intervals of about 100 feet. Dr. E. Dicyan, a leading New York chemist, was given a sample of the material by Dr. Kraig. He was unable to analyze it, and gave it to Dr. Eugene Schwartz, one of America's outstanding authorities on man-made fibers. Dr. Schwartz is quoted as having said: "This is a construct, but unknown to our technology."

The material is reminiscent of angel's hair, but is not the same, since angel's hair is said to "melt" when touched. Here at SAUCER NEWS Headquarters, we have not yet attempted to have the fiber analyzed, though we are anxious to do so. Any reader who has access to a chemical laboratory should get in touch with us as soon as possible, and we will gladly send him some of this strange material.

Kailoa Station, Gisborne,
New Zealand
9 November 1964

Farmer Observes Sphere

At 8 p. m. on 9 November 1964 Trevor Foss of Kailoa Station, Gisborne, New Zealand, responded to his son John's call to watch a light in the northern sky. When Foss looked, he saw a ball of light brighter than any star traveling south toward him.

The Foss homestead is in the hills 1,000 feet above sea level. Using his night binoculars Foss, his son and another were able to view the object. It took 5 minutes to go from its position when first seen in the north to the southern horizon.

Foss, in a letter to Harold Fulton who was inquiring on behalf of APRO, said that two minutes prior to "first sighting the space ship", they had seen a bright ball disappearing in the east over Gisborne. The Foss farm is 22 air miles south of Gisborne. A quarter moon was in the west behind the observers.

The "space ship," as Foss referred to it, did not pass directly overhead, but rather "slightly away"—presenting a side view. The object presented a spherical appearance, the leading edge was outlined by a single dark line and it and the dark portion immediately behind were glowing hot with the major heat on the leading edge. The rotating light beams were a brilliant white and were projected downwards and toward the rear. The binoculars afforded a view which disclosed 6 jet-like objects at the rear, the lining or inside of which was golden-colored. The jets gave off a brilliant blue flame. Mr. Foss was unable to clearly discern what linked the tail of the disc with the rear jets but was able to get a clear view of the jets.

Foss, his son John (15) and a worker saw the object and Foss telephoned neighbors who also saw it but not as clearly as they were not equipped with binoculars.

Waldwick, N.J. 07463
11/15/64

Dear Sirs:

Tonight, at approimately 5:00 PM EST, we saw what we believe a UFO. Let me give you the facts leading up to this sight. At 2:30 about 12 boys and girls were playing softball. After the game, 2 boys and I walked with 3 of the girls down town for a soda and then we planned on walking them home. At approximately the above time, we arrived at a railroad bridge. Here the cars pass over a track. We sat on the wall of the bridge and we were looking at the sky. I explained that the ring around the moon was partly dust and pollution. Then we all noticed a light aginest the sky. We took it as nothing at first but it then occured to us that the sky was still partially blue. And it couldn't have been a searchlight because we would have seen the rest of the beam of light. It wasn't a star because it was brighter. We watched watched it for minute and it disappeared. At this point we knew it wasn't a plane because it didn't move. And it wasn't a searchlight or star. Next the light appeared just between some trees. It didn't move to this position, it just appeared. Then it started to move and it disappeared. This is all we saw of it. Later I took the position. It was about 165° SSW the first time and between 240° and 255° SW and WSW. These are just approximations. The girls were worried and they asked me to write.(By the way. these are not very accurate. I will obtain more informat on and readings tomorrow.)I will be glad to take a picture of the area and mark their positions. Also, I will be glad to provide a signed statement by all of us. Please write me. Also, if you have any information on these areas, send me some, please.

Thanking you in advance,

A sincere [redacted]

El Paso, Texas
10 November 1964

Disc Formations Over El Paso

Several residents in El Paso, Texas observed formations of unidentified flying objects in early November and at least two families feel that electrical phenomena may have been linked to the passage of the objects overhead.

Our first report came from Mrs. Margaret Tinguely, dated 10 November, 1964:

"On Friday, November 6 at about 8 p. m., (not certain) my son and I saw two lights of changing colors going east-northeast from the west and keeping a high rate of speed. One light deviated to the north and went out and the other kept going a short distance, then it too went out.

"Twenty minutes later or so two cream-colored discs of light going in the reverse direction—i. e., east to west-southwest at a high rate of speed followed by a red light centered behind them. This would have been one half the size of a dime held at arm's length.

"On Monday night, November 9 at 8:15 p. m. my husband, son and I saw six cream-colored circular objects coming from the east-northeast and headed in a west-southwest direction. They were in a chain-like formation (like a centipede) and as they passed overhead, they broke the chain and grouped into formation of threes, twos and then they spiraled up without light—but still obvious for a second or so as dark shadows.

"Our neighbors came outside complaining that their house lights were flickering on and off. One neighbor had trouble with her refrigerator turning off and on also.

"No news of this was in the newspapers—we did *not* report this either." Unquote.

Mrs. Tinguely's second communication was dated 13 November and is self-explanatory:

"Tuesday, November 10, at 8:20 p.m., a neighbor, Mrs. Tanner, my children and I saw about 10 to 12 disc-like lights (they moved too fast to count easily) moving from the north and headed south. They

(*See "Formatons", page 2*)

Formations . . .

(*Coninued from page 1*)

were in a V formation (as birds fly). They became dark as they pulled up and out of sight. They were about half the size of a dime held at arm's length and a pale pink-cream color. Mrs. Tanner called a local radio and TV station and told them what he had seen. I, too, called and was informed that I was the ninth caller. The reporter said that most of these calls had come from northeast El Paso and asked me if this was where I had seen them and I confirmed the fact. We are a block or so from Fort Bliss. The reporter said he had so many calls of these sightings that he would mention them at his 10 p. m. news cast, which he did. He said many of the callers had mentioned having seen these objects on Monday night also."

There may be some significance in the "pull up" over Fort Bliss, and there may not be, but it is obvious that the area has some relation to *something* for two sets of the disc-shaped objects pulled up and out of sight over that area. We will keep members posted on this set of incidents. El Paso's location at the southern tip of the White Sands Range plus the location of the huge army installation, Fort Bliss, and the existence of Biggs Air Force Base, a SAC installation, makes the area quite important from a military standpoint.

Buenos Aires, Argentina
14 November 1964

.FLYING SAUCERS OVER ARGENTINA: On the night of November 14th, a mysterious object was observed by astronomers at the San Miguel Observatory, near Buenos Aires, Argentina. The red-colored UFO crossed the sky at about 4½ times the speed of a man-made earth satellite, according to a spokesman for the Observatory. A half hour later, the same object crossed the sky again, going in the opposite direction. It did not resemble any known type of satellite either in speed or orbital height.

A few nights earlier, two men in a truck traveling along a highway near Parana in the northern province of Entre Rios, reported to police that a fast-moving brightly-lit object swooped down on their truck several times.

These incidents are just two in a continuing Argentine flap, consisting of frequent near-landings, occasional landings, and scattered reports of little men. Unfortunately, our clipping services do not send us more than a small percentage of these reports.

Information Only

Buenos Aires, Argentina
14 November 1964

Mystery Object Over Argentina

Astronomers at the San Miguel Observatory near Buenos Aires, reported seeing an unidentified, red-colored object which sped across the southern sky at 4¼ times the speed of a man-made satellite, on Saturday night, the 14th of November 1964.

The object, elongated, flattened and reddish colored, traveled from west to east at 8:35 p.m., from east to west five minutes later (8:40) and from west to east at 9:05 p.m.

The astronomers who observed the mysterious object said it crossed the observatory's telescope range in four minutes, whereas normal artificial satellites take roughly 18 minutes.

Astronomers at San Miguel Observatory also said the object could not have been an artificial satellite because it crossed the sky from opposite directions, it did not resemble any known type of satellite, and that even taking into account different orbital heights, the difference in speed was unaccountable.

The same Reuters dispatch which carried the above information also stated on the preceding Tuesday (10 November) two men in a truck traveling along a road near Parana, in the northern Province of Entre Rios, reported to police that a fast-moving bright object showering blue and white flashes swooped several times on their vehicle.

14 November 1964
Akron, Ohio

November 14, 1964 . . . 5:14 P.M.. . . An Akron elementary school principal reported the peculiar behavior of a large red, round light. He was about 4 blocks from Main Street, and proceeding W on Exchange Street. Using the Akron Beacon Journal's sign as a point of reference, he noted that its direction was still the same a block later. Then the object moved left (SW) of where it had been. It stopped, was plainly visible against the clear evening sky, then disappeared.

The amazed observer looked again and again, but that was the last he saw of it.

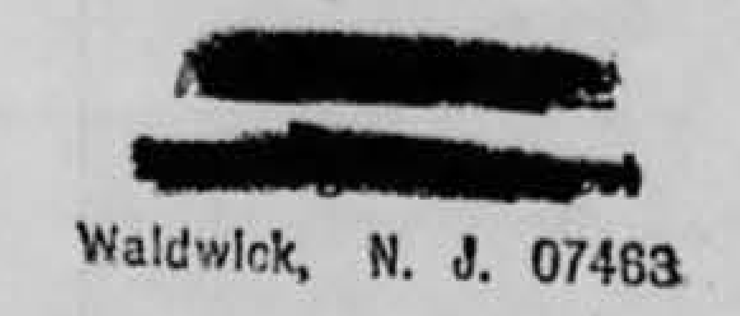

Observer: Mr. Ralph Tate.

[redacted] Difficult because
Woonsocket R.I. of inarticulate report.

Dear Dr J Allen Hynek — JJH

I supose you'l find the answer to what I saw, I did the best picture of it I could, Dr Carabell from The Blue Book says we see those things because we want to believe me I was not looking for this, I was scared stiff, I stop my car when I got closer and I thought my hair would come up on my head, thats how scared I was it was 10⁴⁵ at night and this disc or whatever you call it was low about 125 feet or 150 feet up in the air or so it seemed to me; Ill never forget this as long as I live, the next night my son said he seen it too, he was with a bunch of girls and boys parked in a field, and they seen it too; I dont know if they seen the fire but I did, now can you explain that to me or can any body do it. Id be very glad to find out more about it =

The fire would cut right out from That obgects cut like you would with a Knife it would gush out with a noise am I a nut or what, Im 58 years old, I think Im normal, maybe others dont think so I feel silly writing This because it allmost seems Imposible, The next morning I call The Woonsocket and ask if anybody had called about a Saucer, the answer was no, I felt like a nut honest I did maybe youll think the same, but thats what I realy did see believe or not the motor was going it was stop Then I started and well I explain enerting of The chart, I supose Ill get an answer That Im a nutty Fruit cake and Ill believe you OK but believe me I seen This thing in late 1964 around octo or november hope to here from sombody about This soon, [redacted]

almost color of stars

Motor was running but this thing was staying still in pl[ace] all of a sudden it star[ted] going just like a plane motor - it cross the street and then fire started to come out of the back part of it when it got across the street

fire would be like large flames size about 18 to 20 in long
I seen that fire comming out about 4 or 5 times

fire pushes out made noise like psss psss

I was very scared

I stop [car]

Farm St Blackstone Mass

St Charles Cemetery

high trees

disapeared here in back of trees

trees

Railroad tracks

railroad tracks

Woonsocket R I
a way down here

about 9/5/80 yet

Railroad tracks

Woonsocket R I
a way some where
about 10 or 100 feet.

hugh trees
disapear here
back of trees

St Charles Cemetery
